Global x Regional Session

(Plenary) *Importance of regional cooperation using space technology for SDGs*

- **Topic:** Importance of regional cooperation using space technology for SDGs
- **Planned date and time:** Friday, November 29, 9:00-9:45 (45 minutes)
- **Venue:** Plenary (Main Hall), 3rd Floor
- **Format of the event:** Presentation and Panel discussion

**Description of the event:**

For tackling common social issues in the Asia-Pacific region to which space technology can contribute such as water resource management, food production and disaster management, panelists from government, academia, industry and international organizations will introduce expectations and examples of efforts being taken with respect to regional cooperation using space technology from different perspectives so as to discuss how to promote it.

Through the panel discussion, panelists will discuss the possibility of contributions from and partnerships with diverse players such as space agencies, regional organizations, universities, and companies including start-ups for regional cooperation through APRSAF, in particular the SAFE (Space Applications for Environment) EVOLUTION initiative, for achieving SDGs, which are shared global goals.
