

Education/Awareness Activity Report

**1. Reporter's Name: Michiro Kusanagi, Ph.D. Visiting Professor
Asian Institute of Technology (AIT)**

2. Activity's Name: Recent Activity of AIT

3. Content:

The GIS Application Center (GAC) of the Asian Institute of Technology (AIT) has been conducting the training programs supported by JAXA and other training programs requested by other customers every year.

In addition, AIT had been performing the continued function as secretariat for the Digital Asia project in the Asian Center for Research on Remote Sensing (ACRoRS).

In the space technology applications and research course Remote Sensing and GIS for undergraduate education, a pilot experiment of the i-Space series on remote education among the Malaysian Multi-Media University and Japan's Tsukuba University (supported by KDDI and supervised by JAXA) has been initiated every Thursday afternoon from February to March 2004 as a new activity or precursor of the WINDS project..

4. Date: February to March 2004

5. Target: University students

**6. Place to be held: AIT, Thailand, Malaysian Multi-Media University and
Japan's Tsukuba University**

7. No. of Attendants: Around 40

8. Comments, if any: none
